Payout Eligibility

What qualifies users to receive payouts

Before receiving payouts, users must become producer-verified by submitting government-issued photo identification and Custodian of Records (2257) name and address information via their account preferences. Administrators review the identification to confirm the producer's identity and verify that they are at least 18 years old, noting when the producer's face is also included in the submitted photo. (Verified producers receive a green checkmark beside their displayed username.) Users must also submit a completed and signed W-9 or W-8BEN tax form with information matching their photo ID. Submitted documents are securely retained offline in encrypted storage, while verification and tax status remain recorded on the user's account.
